TERMS FOR USE

Water may be drawn from fire hydrants for construction or other approved uses only through meters issued by the Waukesha Water Utility. Appropriate back flow prevention is the responsibility of the permit holder.

Hydrant use is restricted to those hydrants which are located immediately adjacent to a construction site or other location of use (as identified in the "Application for Hydrant Meter").

Hydrants and Meter will be used as follows: Turn hydrant full on; turn meter valve on. When done, turn meter valve off and turn off hydrant very slowly. Meter must be removed from hydrant at day's end and stored in a secure location. Failure to follow this procedure could result in broken/stolen equipment and/or water mains. Repair/replacement expenses will be borne by the permit holder.

Water drawn from hydrants may not be transported for use outside the City of Waukesha except by the fire department when fighting a fire. Any meter used for this purpose will be immediately removed by the Utility.

No person shall use or attach any device on a hydrant unless that person has an authorized meter in use at the site, is familiar with proper hydrant operation, and is equipped with appropriate tools (fittings and hydrant wrench) to prevent damage to the hydrant.

During the months of freezing weather the permit holder must report meter use to the Utility no later than 3:00 pm. Meters used on hydrants must be removed daily, carefully drained and stored to prevent damage by freezing. These procedures are required to ensure operable condition of all hydrants in the case of fire.

Hydrant billing is performed quarterly. **Hydrant meters should be read on or about the 15th of January, April, July, and October.** Meter reading cards will be provided to each customer at the time of application. Authorized personnel will record the account number, meter reading, reading date, meter number, site location and company name on the card. The completed meter reading card must be mailed to the Waukesha Water Utility by January 18th, April 18th, July 18th, and October 18th. Receipt of quarterly readings is necessary, and failure to provide readings at these times may require return of the hydrant meter.

Any person or firm found in violation of these rules will be billed by the Waukesha Water Utility based on time and materials at current authorized rates for inspecting and repairing the hydrant.

Any damages to Waukesha Water Utility facilities/equipment in coordination with the permit are the responsibility of the permit holder and will be billed accordingly.

The deposit paid when the meter is taken out may be applied to any charges incurred in conjunction with this permit. After return of the meter, the Utility will use the deposit for any outstanding amounts due, and return the remainder to the permit holder.

Meters must be returned to the Meter Department at 132 E. North Street, Door # 10.
